

1. Typhlop is a
(a) True snake (b) False snake
(c) True worm (d) Shark
2. Which one of the following is a limbless lizard
(a) Hemidactylus (b) Chamelion
(c) Anguis (d) Phrynosoma
3. Which is a poisonous snake
(a) Enhydrina (b) Typhlops
(c) Python (d) Eryx
4. Poison glands of snake are modified
(a) Sebaceous glands (b) Ceruminous glands
(c) Salivary glands (d) Endocrine glands
5. Whose skin colour does not change
(a) Chameleon (b) Horse
(c) Garden lizard (d) Two of the above
6. Some reptiles show autotomy which means
(a) Voluntary breaking tail to confuse enemy
(b) Signal for charging
(c) Signal for courtship
(d) State of starvation prior to death
7. Archaeopteryx called a connecting link, carried the characters of
(a) Reptile and bird (b) Reptile and mammal
(c) Fish and amphibian (d) Amphibian and reptile
8. Characteristic feature of aves is
(a) Presence of beak and features
(b) Ability to lay eggs
(c) Air spaces in lungs
(d) All the above
9. Only right aortic arches are present in
(a) Reptilia (b) Mammals
(c) Birds (d) None of these
10. A pigeon in the absence of down feathers will not be able to
(a) Fly for long distance
(b) Protect against ectoparasites
(c) Exhibit secondary sexual dimorphism
(d) Keep the body warm
11. The beak in birds is toothed in
(a) Ostrich (b) Kiwi
(c) Archaeopteryx (d) Pelican
12. The vertebrae of birds are characteristically

- (a) Heterocoelous (b) Acoelous
(c) Opisthocoelous (d) Amphicoelous
13. Members of which group of the followings, have three ossicles in their internal ear
(a) Amphibia (b) Reptilia
(c) Aves (d) Mammalia
14. Egg-laying mammals are grouped as
(a) Eutheria (b) Prototheria
(c) Rodentia (d) Metatheria
15. Which of the following animals is an example of class mammalian
(a) Manis (b) Planorbis (c) Hydrophis (d) Psittacula
16. Eutherian mammals are
(a) Oviparous
(b) Viviparous
(c) Ovoviviparous
(d) Both oviparous and ovoviviparous
17. Animals belonging to the order 'rodentia' have
(a) Long incisors (b) Long canines
(c) Short incisors (d) Long molars
18. Double circulatory heart is present in
(a) Birds only (b) Mammals only
(c) Reptilia only (d) Both (a) and (b)
19. Rabbit belongs to the order
(a) Rodentia (b) Lagomorpha
(c) Artiodactyla (d) Perissodactyla
20. The mammal which possesses both the reptiles and mammalian characters
(a) Marsupials (b) Monotremes
(c) Equus (d) Oryctolagus
21. Members of which group of the followings, have three ossicles in their internal ear
(a) Amphibia (b) Reptilia
(c) Aves (d) Mammalia
22. Egg-laying mammals are grouped as
(a) Eutheria (b) Prototheria
(c) Rodentia (d) Metatheria
23. Which of the following animals is an example of class mammalia
(a) *Manis* (b) *Planorbis*
(c) *Hydrophis* (d) *Psittacula*
24. Eutherian mammals are

- (a) Oviparous
 - (b) Viviparous
 - (c) Ovoviviparous
 - (d) Both oviparous and ovoviviparous
25. Which one of the following is not a mammal
- (a) Ant eater
 - (b) Echidna
 - (c) Heloderma
 - (d) Dolphin
26. Why do mammals lack mucus glands in their skin
- (a) The skin is not slippery
 - (b) The skin is tough
 - (c) The epidermis has many layers of cells
 - (d) The skin is not respiratory
27. Cerebellum of one of the following animals is provided with lateral lobes and arborvitae
- (a) Reptilia
 - (b) Mammals
 - (c) Birds
 - (d) Amphibia
28. Tortoise are
- (a) Viviparous
 - (b) Oviparous
 - (c) Bisexual
 - (d) Parthenogenic
29. Which of the following is a non poisonous viviparous snake
- (a) *Ptyas*
 - (b) *Echiscarinots*
 - (c) *Uropeltis*
 - (d) All of these
30. The reptile which glides in the air is
- (a) *Draco*
 - (b) *Phrynosoma*
 - (c) *Anguis*
 - (d) *Calotes*

1. (a)
2. (c)
3. (a)
4. (c)
5. (b)
6. (a)
7. (a)
8. (d)
9. (c)
10. (a)
11. (c)
12. (a)
13. (d)
14. (b)
15. (a)
16. (b)
17. (a)
18. (d)
19. (b)
20. (b)
21. (d) Middle ear of mammalian with three ear ossicles malleus, incus and stapes.
22. (b) Prototherians are primitive mammals, egg laying mammals, oviparous mammals, reptile like mammals, confined to Australian region.
23. (a) *Manis* (Pangolin or scaly anteater) is belong to the order pholidota of the class mammalia.
24. (b) Eutheria includes viviparous placental mammals.
25. (c) Heloderma is a reptile (lizard).
26. (d) Mucous makes skin moist. Moist skin is helpful in respiration.

27. B

28. B

29. A

30. (a) *Draco* is a lizard which glides with the help of patagium, it is called 'flying dragon'.
